## Company presentation:

Since 1954 Wariofil is a medium-sized company, which is planning, drawing, constructing, producing packing machines. These machines will be exported world-wide.

All machines are manufactured in the special modular WARIOFIL construction system and they can be enlarged, extended and reinforced in any size, at any time at any place.

Our company has an excellent reputation due to reliability, expert knowledge and flexibility. We are always trying to increase it by personal engagement, development and customer applied management.

Wariofil is developing, constructing and manufacturing packing machines for many and several scopes: granulates and powders can be filled and all kinds of plastic bags can be sealed and coded. Goods can be mixed and transported.

With our machines foods, e.g.: dry vegetables, cereals, grains, müsli, rice, sugar, salt, beans, spices, flour baking mixtures, dry supplements, dried skim, milk powder, bread crumbs, frozen food, frozen fish, frozen meat, poultry parts, mushrooms (dried, fresh, with salt water, frozen) frozen vegetables can be filled and sealed, coded. Each time corresponding what is to do with the separate product.

However, the functionality of the machines is not only limited to fill food stuffs.

Animal food: especially dog food (sticks),cat food,(sticks),horse pellets (sticks),pharmaceuticals (hard capsules),chemical products (washing powder,dry cleaner or dry dish cleaner,caustic soda black powder,pearls) can be filled,sealed and coded.

Following products can be handled too:small plastic parts,charcoal for filters,active coal,seeds, cement mixed with sand,grass-seeds,wooden pellets (mixed with confetti),small screws and nails.

The coding and sealing machines are especially made out for the sealing and coding of all kinds of bags,foils,laminates,aluminium and all kinds of heat sealable foils.

All machines are also produced in stainless steel.

The range of production contains at least 100 different standard models which are deliverable practically immediately from stock.

Each machine will be produced and prepared extremely careful according to the samples which had been given to us from the customer. The operation personal will be instructed and trained carefully so that they know to handle the machines very well. Otherwise strict plans and operation instructions will show how to use the machines when they are exported.

Due to permanent development as well as flexible adjustment to the requirements of the market and the very special requests of the customers our company has reached a significant reputation.

### **Priorities:**

Due to the long experience Wariofil can guaranty:

durable and very good functionality of the machines  
highest quality standard for all machines  
machines easy in handling and maintenance-free,no greasing-no oiling  
highest endurance concerning technical outfit  
reliability,stability,large of use and flexibility of the machines  
machines and plants are ready for immediate function

### **Special service:**

professional and individual advise  
if requested we send you very detailed leaflets. The complete range of the machines as well as all technical documentations can be sent by email immediately.  
All dimensions and sizes of the machines / plants,too.

For further informations please don't hesitate to contact us.

**Range of production:**

Filling and packing machines

electronical weighing machines

small and separate filling machines, to be placed on a table

semi-automatic filling plants

fully automatic filling plants

fully automatic vertical packing machines

**Pans for sweets**

**Emptying machines for containers**

**Semi-automatic labeling machines**

**Conveyor machines**

vertical conveyors

screws

inclined conveyors

vakuum conveyors

**Mixing machines**

V-blender in stainless steel

pans for sweets in stainless steel

**Machines for testing sealed bags filled with toxic  
and dangerous materials, liquids, acids etc. after being filled**

**Sealing and coding machines**

continous bag sealing machines

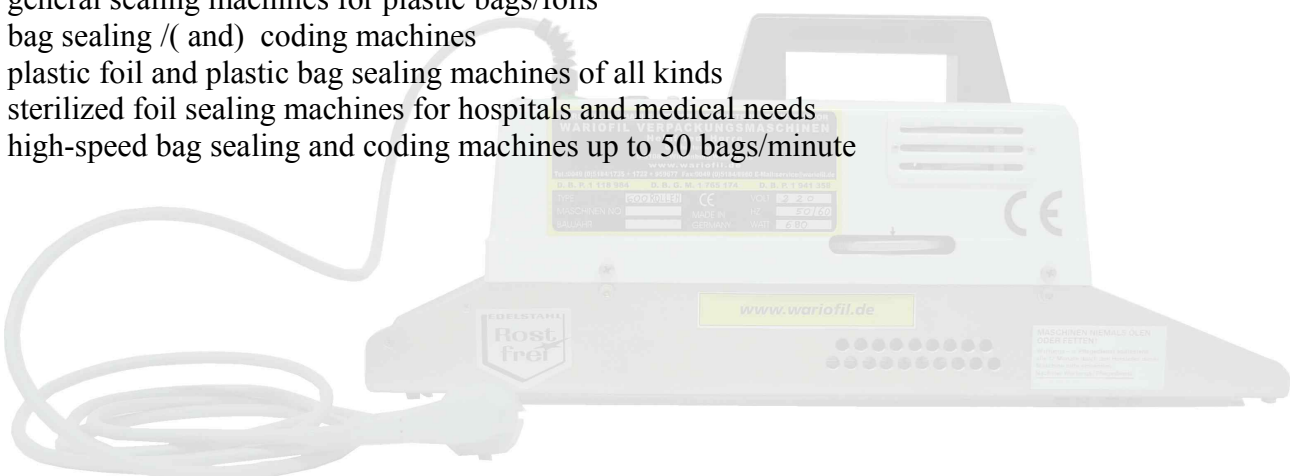

general sealing machines for plastic bags/foils

bag sealing /( and) coding machines

plastic foil and plastic bag sealing machines of all kinds

sterilized foil sealing machines for hospitals and medical needs

high-speed bag sealing and coding machines up to 50 bags/minute

## **Heat sealing machines**

sealing card-o-seal bags, aluminium bags, coated bags, laminate bags,  
paper bags outside with sealable material inside ( pp/pp/etc.)

## **Conveyor belts**

All machines will be produced brand-new and they are corresponding to the special customer`s requirements.

We produce the packing plant according to the individual indications, separately and strictly to the latest German laws for machinery under consideration of all valid laws and rules for security.

All machines are available as brand new models and / or: occasions, too.  
They also can be hired either for a short or a long period.

## **Fixing of our aim:**

Due to excellent production quality and offers of used machines, a set up and deepening of further, future planned business relations, based on partnership under maintenance of the previous, positive judgements of our customers, will be aspired.
